MEDIA RELEASE

NAMPOST INAUGURATES COURIER CENTRE IN WINDHOEK

Namibia Post Limited has today inaugurated a new logistics centre in Windhoek. This centre is refurbished with the assistance of Namibia Post and Telecom Holdings, (NPTH) the parent company of NamPost. The purpose of the new logistics centre is to improve on operational efficiencies for NamPost Courier Services. For the past 22 years, NamPost Courier has been operating in a relatively small warehouse which made the sorting of consignments for transportation to different parts of the country challenging.

NamPost Courier is one of Namibia's leading logistics companies, focusing mainly on domestic and international express freight. The national footprint offers domestic service, covering more than 60 overnight destinations, delivering freight of different shapes and sizes.

NamPost Courier covers 220 international destinations in collaboration with strategic partners. This allows NamPost Courier to offer competitive rates without compromising service delivery.

NamPost Courier will introduce additional products and services which will complement its already existing services:

1. Mobile Hand-Held Technology: This is a hand-held scanning device which will be used to scan items on the go. This device will be available at all Post Offices country-wide soon.
2. Economy Services: This service will give clients an opportunity to book for space and time required to send parcels, at their own convenience.

3. Seven new Products: In addition to the "EasyPack", seven new additional courier products will be introduced. These new products will complement the Counter to Counter and Counter to Door Services.
4. Route Matrix: Will serve as a basis for refining prices for items in terms of distance.
5. Value Added Services: NamPost is pleased to announce that Courier services will also be carried out on Saturdays, afterhours and same day delivery.
6. Prepaid Account: This type of service will allow business clients that frequently make use of NamPost services to have better cost control, less administration hurdles, as well as pricing benefits.

NamPost Courier will continue to expand its International Delivery and Collection Service to its vast global network.
