## INTRODUCTION

*Dear esteemed Philatelist,*

The year 2020 has been dominated by the COVID-19 pandemic, which has affected all of our lives in complex and at times tragic ways. We've decided to continue to focus on the good things in life, and thus present another diverse range of stamps for 2021. Namibia's rich natural heritage continues to provide interesting and vibrant subjects. The floral diversity of our mostly arid country may come as a surprise to some, yet Namibia is home to numerous endemic plants, many with very attractive flowers. The nearly 700 bird species recorded in Namibia offer near inexhaustible motifs, as do the many intriguing and often little-known mammals.

Enjoy collecting this novel range!

## BARLERIA FLOWERS OF NAMIBIA

**The genus *Barleria* consists mostly of subshrubs and herbs.**

*Around 30 species occur in Namibia. Many of them are endemic and occur nowhere else on Earth.*

**Issue date:** 14<sup>th</sup> of July 2021

**Artist:** Helge Denker

**Products:** Four stamps;

first-day cover with special canceller & information insert

**Stamp size:** 35 mm x 25 mm

**Quantities:** 15,000 stamps of each denomination;  
800 first-day covers

## SNIPES OF NAMIBIA

**Snipes are cryptically coloured, secretive birds that mostly go unnoticed.** *They are also astounding voyagers – an individual was recorded covering 7,000 kilometres in three-and-a-half days.*

**Issue date:** 16<sup>th</sup> of March 2021  
**Artist:** Helge Denker  
**Products:** Three stamps;  
first-day cover with special canceller & information insert  
**Stamp size:** 35 mm x 35 mm  
**Quantities:** 15,000 stamps of each denomination;  
800 first-day covers

## MUSTELIDS OF NAMIBIA

**Issue date:** 12<sup>th</sup> of October 2021  
**Artist:** Helge Denker  
**Products:** Five stamps;  
first-day cover with special canceller & information insert  
**Stamp size:** 40 mm x 30 mm  
**Quantities:** 15,000 stamps of each denomination;  
800 first-day covers

**Mustelids are members of the weasel family, characterised by a long body with short legs, as well as scent glands under the tail.** *They live in a variety of habitats and include aquatic species such as otters.*
